DETAILED ACTION

Allowable Subject Matter

1. Claims 1-8, 11-22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The best prior art of record to Ashizawa et al. (US 6,976,635) discloses an IC card storing attribution information about application stored therein,

Khare et al. ("XML: a door to automated Web applications", Internet Computing, IEEE, Volume 1, Issue 4, July-Aug. 1997 Page(s), 78 – 87) discloses a method of presenting XML document containing attribute information/tags,

Reynar et al. (US 2002/0035581) discloses application program interface providing labeling information during creation of a document and user actions based on semantic label applied to labeling information.

However, Ashizawa et al., Khare et al., and Reynar et al. taken alone or in combination with other references fail to particularly teach that the method and a portable data carrier comprising reading in of specification data describe the file system in a semantic label, a processor interpreting the read-in specification data, and installing the file system according to the interpreted specification data in a memory of the portable data carrier as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
